

# AMGA, Lightbeam Health Solutions Announce Collaborative to Help Health Systems and Providers Excel in Medicare Advantage

**IRVING, TX – March 27, 2019** – Lightbeam Health Solutions, a leader in end-to-end population health management solutions and services, and the American Medical Group Association (AMGA), a trade association leading healthcare transformation, announced today an 18-month collaborative to help health systems and provider groups maximize the effectiveness of Medicare Advantage (MA) and other value-based contracts. The collaborative will feature content focused on streamlining operational workflows, health outcomes, the patient experience, and increasing coding accuracy.

This initiative will follow AMGA's successful learning collaborative framework, which has been used in over a dozen collaboratives to deliver measurably improved care and reduced costs. AMGA participants are invited to enroll in the collaborative no later than 5:30 p.m. (PDT) Monday, May 13. Enrollment is on a first come, first-serve basis. The collaborative will begin September of 2019.

This new collaborative will help position AMGA members to excel in MA by aligning with "Triple Aim plus One." The collaborative will cover developing risk-based infrastructure; understanding and managing patient populations through risk stratification, data analytics, clinical programs, and homebased care. It also seeks to explore how provider groups can transform care delivery systems to meet the socioeconomic and behavioral needs of patients with MA coverage and ensure compliance with documentation regulations while engaging physicians in the process.

AMGA participants will have the opportunity to learn from industry experts on areas including best practices in how to take on downside risk in MA plans, how to develop care models to manage chronic conditions, and how to utilize technology including analytics and predictive modeling to identify and proactively care for high-risk or high-cost groups of patients.

Participants will also learn how to work with health plans to agree upon financial consideration and contract terms, the methodology on how CMS rates those plans and what it means for group practices, and how provider groups can implement care management to satisfy the needs of their patient population.

“As AMGA member organizations continue their journey towards high performance, we see MA strategies as a natural progression,” said Jorge Miranda, EVP & Chief Revenue Officer of Lightbeam Health Solutions. “Organized systems of care are well positioned to execute on population health best practices that will further reduce unnecessary utilization and improve outcomes. We are honored to have been selected by AMGA to participate in this collaborative.”

### **About AMGA**

AMGA is a trade association leading the transformation of health care in America. Representing multispecialty medical groups and integrated systems of care, we advocate, educate, innovate, and empower our members to deliver the next level of high-performance health. AMGA is the national voice promoting awareness of our members’ recognized excellence in the delivery of coordinated, high quality, high-value care. More than 175,000 physicians’ practice in our member organizations, delivering care to one in three Americans.

### **About Lightbeam Health Solutions**

Lightbeam Health Solutions delivers a revolutionary model for managing patient populations and associated risk. Lightbeam’s vision is to bring health data into the light through the use of analytics and to provide the insight and capabilities healthcare clients need to ensure patients receive the right care at the right time. Lightbeam’s platform facilitates end-to-end population health management for ACOs, payers, provider groups, health systems, and other healthcare organizations aspiring to provide superior care at a lower cost.
