

Millennium Leverages Lightbeam to Drive Value-Based Efforts for 7 ACOs and 6 Medicare Advantage Plans

More than 300 providers supporting 170,000 patients will leverage Lightbeam's solutions to enhance patient care, lower costs, and manage multiple payer contracts

IRVING, TX – March 6, 2018 – Expanding on its dedication to deliver exceptional healthcare throughout the southwest Florida region, Millennium Physician Group is engaging its providers and patients with a population health management platform from Lightbeam Health Solutions.

More than 300 providers across several primary care offices and specialty locations are coordinating patient care across multiple payers and programs. Millennium is using the following Lightbeam solutions to manage their contracts and patient population:

- Enterprise Data Warehouse
- Clinical and Claim Analytics
- Predictive Modeling Through Cohorts
- Development of Provider Scorecards
- Care Management Platform
- HCC Coding
- HEDIS and Risk Stratification
- GPRO Reporting

Millennium Physician Group supports over 170,000 patients across fourteen payer contracts, which includes three high-performing Medicare Shared Savings Program (MSSP) accountable care organizations (ACOs), six Medicare Advantage plans, and four commercial payer ACOs, in addition to providing management service organization (MSO) services.

“This partnership is instrumental in our growth strategy. Lightbeam has been a pivotal tool that has allowed us to shift from fee-for-service to value-based care much faster than we otherwise could have,” said Jeffrey Nelson, Chief Information Officer (CIO) for Millennium Physician Group. “Lightbeam was the best population health management system we evaluated. Their technology platform, growth capabilities and the ability to integrate all data sources into one integrated system was key to our decision. Millennium has always been a top performer in the MSSP programs with both Track 1 and Track 3 ACOs and I think it speaks volumes that we selected the Lightbeam solution to help take us to the next level. Lightbeam's successful track record of working with multiple ACOs and payers, in addition to empowering providers with tools to improve the lives of patients, gives us the ability to better coordinate care across all of our teams while also identifying areas to lower the cost of healthcare.”

As more patients are impacted by chronic illness, Millennium Physician Group sought a platform that would allow their care teams to better manage these patients in a scalable way by automating the process of identifying those in greatest need and who fit specific criteria.

“We share Millennium Physician Group's commitment to deliver the highest quality of care while equipping their providers with the solutions needed to manage the lives of thousands of patients across various care teams and locations,” said Pat Cline, CEO of Lightbeam. “We have enjoyed collaborating

with them and look forward to the future as we continue to support their business goals and partnerships.”

About Millennium Physician Group

With headquarters in Fort Myers, Florida, Millennium Physician Group is one of Florida’s largest independent physician groups with over 300 physicians and 1,400 employees. Millennium consists of primary care offices, specialist offices, walk-in medical centers, lab services, imaging centers, a Millennium pharmacy, and one of the top Accountable Care Organizations in the country.
